Can cell phone jammers be used on the plane?

2020/04/29

Hi Lenny! Yes, it is quite possible that in the nearest future there will be special technology which allows people to use their mobile phones on the planes. Many folks may feel happy about it because if this will happen they will be able to be in touch even in the air. Yet other people will become angry because such quiet place as plane will be also ruined by rude cell phone talkers. Answering your question I must say that if you belong to the second group of people I have mentioned above, you may feel happy too because the same technology that may allow cell phone usage will automatically give green light to the cell phone jammer usage. If cell phone signal will not interrupt plane's equipment work then jammers would not do it either. So now the only thing you need to do is to wait for the future to come and to show what it has for us. If mobile phones will be used on planes then you can purchase mobile phone jammer and enjoy peaceful flight in silence. As you have always did! :)
